Evening Service, 7:30 p.m.  
Worship, 11:00 a.m.  
Mayfield, 2:00 p.m.  
Rev. A. J. Law, B.A., Pastor

### BOARD OF THANKS

We, the members of the family of the late J. F. Rivers, hereby wish to thank our friends and acquaintances for their many acts of kindness during our recent bereavement.

The question of Canada joining with the U.S. in the St. Lawrence waterway project is a subject that most of us are ignorant upon in regard to benefits to Canada. However, regarding benefits to the U.S. some telling arguments recently released by President Roosevelt sheds light on his view point on the subject. He issues the report of an amazingly detailed investigation by the New York State Power Authority which shows that the northeastern states are paying for electric power nearly twice the amount that the actual costs warrant. The Senators of New York, Pennsylvania, New Jersey and the six New England states may find it hard to oppose the treaty after the showing, that whereas their states pay an average of 6 cents per kilowatt hour, 3¢ cents would allow a fair profit. The President holds with the report that the St. Lawrence project, costing \$330,000,000, would save \$104,000,000 annually on electricity alone to 7,000,000 users. Will this strategic move arouse public sentiment to assist the once-defeated treaty through Congress?

The Empress ferry on the South Saskatchewan was taken out of operation this week.

The marriage was solemnized on Wednesday, November 14, of Luara Mabel, daughter of Mr. and Mrs. R. J. Nickle, of Mr. Geo. E. Durk, Mr. L. Hauma was best man and Miss Irene Durk, bridesmaid. Rev. J. S. Parks performed the ceremony which took place at 10:45 a.m.

## ON the BATTLE FRONT

THE ALBERTA WHEAT POOL has never chosen to follow the easy ways of least resistance.

Rather it prefers to fight side-by-side with the farm people.

**ALBERTA POOL ELEVATORS**  
SHOULD GET YOUR GRAIN

## Delicious Candies

You will find our stock offers you the finest selection of Candies and Chocolates in town. The volume of our business in sweetmeats assures you of fresh stock at all times and best manufacturers

**EMPRESS DRUG CO., Ltd.**

We are agents for leading confectioners. All flowers ordered on shortest possible notice.

## Results of Mantario Nomination Meeting

The following are the results of the nomination meeting held in Trossley School by R. M. Mantario, on November 19.

Ivor Dahl, the present Reeve, returned by acclamation.

Div. 1, E. Kinch and E. E. Arnold, nominated for Council.

Div. 3, Hugo Dosch and Mansell Leach, for Councillor re-elected by acclamation.

A good number of ratepayers were present, and from the report given by the Sect. Treas., the Municipality is considerably better financial shape than last year.

## To Hold Another Convention

It is stated that J. K. Pollock, the candidate named at the Liberal Convention held at Empress on October 19, has resigned and a further Convention meeting is to be held at Medicine Hat on December 7.

## To Run As Independent

D. McEachern, local aspirant to political honors has announced his candidature in the forthcoming provincial elections as an Independent.

Edward A. Filene, writing in "Liberty" says that President Roosevelt's program, "... demands the nation-wide coordination of all industry; and this is now a business necessity."

"Such national planning is first concerned with high and ever higher wages for labor, and greater and greater returns for agriculture, because by no other method can there be a market for the ever increasing volume of desirable to things which we have now learned how to produce. But it demands more than that. The President has pointed out the necessity for nation-wide insurance against unemployment, against sickness and accident, and against poverty in old age. The object of this, obviously is to make everybody an adequate consumer—a thing which, in a civilization such as ours, is every body's inalienable right to have."

## Burke-Elliott

The marriage took place on Thursday morning, November 15, in the Rectory of the Empress Catholic Church, of Miss Lilian Burke to Mr. Albert Elliott. Rev. Father Leo Sullivan officiated, and witnesses were L. Niven and Miss Sophia Shiner. Dinner was served at the home of the bride after the ceremony. The newly married couple are well known in the district, and will make their home on the farm of Mr. Elliott north of town.

Port Arthur, Ont.—The gold rush to the Sturgeon River area, adjoining the lines of the Canadian National Railways through Northern Ontario to Port Arthur and Port William, is reminiscent in miniature, of those days of early 1900, when the great silver and gold camps in the Cobalt district came into being.

Prospectors and transients have flocked into Jellison station, the centre of the new "strike," by the hundreds and so great is the demand for accommodation that the newcomers were forced to sleep upon the ground and on the floor of the station waiting room.

In an effort to relieve the congestion, the Canadian N.T.R. parked a tourist car on the station siding. The 14 lower and 14 upper berths were sold out each day. Although the weather was reported as turning decidedly cold, the car was adequately heated by a boiler heater and running water supplied the "cabinets." Each day the train from Port Arthur stopped at Jellison station and the locomotive was cut off and attached to the car to pump the air pressure to capacity to operate the taps.

## Public Sale of Lands

Under the Tax Recovery Act

VILLAGE OF EMPRESS

Notice is hereby given that, under the provisions of the Tax Recovery Act, 1929, the lands of Empress, offered for sale, by public auction, at Empress, Alberta, at the office of the Secretary-Treasurer, on Monday, the 17th day of December, 1934, at 2 o'clock in the afternoon, the following lands situated in the said Village, all in Plan No. 50413 A.V.

Lot	Block	Plan
4.....	1	5043 A.V.
6.....	2	"
1 and 2.....	6	"
1, 3 and 4.....	7	"
3 and 4.....	8	"

33.....	29	"
34.....	28	"
7, 8, 10, 26, 36, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.....	41	"

Each parcel will be offered for sale subject to a reserve bid and subject to the reservations contained in the existing certificate of title. Terms cash, unless otherwise arranged with the Council.

Relemption may be effected by payment of all arrears of taxes and costs at any time prior to the sale. Held at Empress, Alberta, this 15th day of September, 1934.

D. McEACHERN,  
Secretary-Treasurer.

## Curlers Hold Meeting

A meeting of the Empress Curling Club took place in the basement of the Empress hotel on Tuesday, for organization for the coming season. Officers elected were: Otis Clark, president; Charley Young, vice president; Bill Leach, Secretary. The program for the season depends on the members obtained and number of rinks operating. It is also to be decided whether the rinks will be mixed or ladies maintain their own rinks.

## Bauer-May

A quiet wedding was solemnized on Thursday, November 15, at the United Church Manor, when Miss Elizabeth Bauer was married to Mr. David May, both of Burstall. Miss Helen Bauer was bridesmaid, and Mr. John May supported the groom. Rev. A. J. Law performed the ceremony.

Our first fall of snow, sufficient to put a light covering on the ground, fell Saturday morning.

## London Expects Active Market for Heavy Water

London—Water is shortly to be marketed here at £2 a gram, not as an aftermath of drought, but as a result of a new invention.

For it will not be ordinary water. It is to be the first commercial production of the "heavy water" containing "heavy hydrogen," recently discovered in the U.S. Chemists declare that this new water will open vast fields of research, and as the result of many experiments Imperial Chemical Industries Ltd. have established a plant which will enable a steady supply to be maintained at a price of £2 a gram.

The discovery of heavy hydrogen, as well as bringing about a revolutionary change in belief in the constancy of the constitution of water, might well bring about a big change in the teaching of chemistry. "Not only may it have an all-important influence on the growth of plants, but the discovery of heavy hydrogen means that there can be many varieties of each formula in which normal hydrogen plays a part. It may well mean that eventually, even in only three years time, no one will be able to learn plain chemistry. A student will have to be specialist."—Christian Science Monitor

## Dates of Married Peoples' Club Meetings

The Married Peoples' Club are holding a dance in the theatre on Mon., December 3, and also will hold a New Year Dance on Tuesday, January 1.

## Farmers' Creditors Act Hearings Are Held

Mr. Walter Huckle, official receiver for the Farmers' Creditors Arrangement Act for Medicine Hat district held a hearing of cases for adjustment at Empress on Friday.

## Whitewash Mixtures

The various ways of making whitewash either for the adornment of the home or as a disinfectant of certain farm buildings are of personal interest.

The mixture used at the Dominion Experimental Station, Scott, Sask., for the inside of buildings used by poultry, sheep and hogs and cattle has several materials added to the lime and water. First, fifty pounds of lime is dissolved in eight gallons of boiling water. To this is added six gallons of hot water which has ten pounds of salt and one pound of alum dissolved in it. A can of lye is added to every twenty-five gallons of the mixture. A pound of cement to every three gallons is gradually added and thoroughly stirred.

The object of using alum is to prevent the lime rubbing off. Cement makes a more creamy

## St. Mary's Anglican Church

Sunday, Nov. 25th:  
Cevandish, 9:00 a.m., Holy Communion.  
Emmie, 11:00 a.m., Holy Communion.  
Cappon, 2 p.m., evensong and sermon.  
Rev. J. S. Parks, Vicar-in-charge

## Still Destroying Coffee

The National Coffee Department in Brazil is still burning coffee. It is restricting the amount of coffee for sale and so hoping to ensure a profitable price for producers. Nearly 600,000 bags of coffee were destroyed in September, bringing the total to 30,516,949 since the scheme was started. But in spite of this wholesale destruction, stocks are increasing at Santos and Rio de Janeiro.

mixture so that it is easier to apply and more surface covered. Lye is added for disinfecting purposes, but a quart of cresol to every eight gallons would serve the same purpose. Lye is preferred when the colour is to be kept white.

Frequently enquiries are made for a waterproof white wash to be used outside. This can be made as follows: Slake 62 pounds of quicklime in 12 gallons of hot water and add two pounds of salt and one pound of sulphate of zinc dissolved in two gallons of skim milk. An ounce of alum per [cont on back page]

## Australian Ace Lands Safely At Oakland After Long Pacific Flight

Oakland, Calif.—Sir Charles Kingsford-Smith landed his big monoplane at Oakland municipal airport Sunday, completing a 2,408-mile flight from Honolulu in 14 hours and 59 minutes.

The flying Australian knight of the air dropped from the skies at 7:44 a.m. (10:44 a.m. E.S.T.) after fighting through fog banks, ending a three-hop jump from Brisbane.

Nearly two hours ahead of his schedule, Sir Charles rocketed in at terrific speed, poked his greasematted face out of the cockpit and spoke a grinning apology.

"I am sorry to be so early," he remarked, "but you will have to blame my navigator, Captain P. G. Taylor."

Among the crowd of 500 persons to greet the daring aviator were Harry Lyon and James Warner, who with Charles Ure flew with Kingsford-Smith from Oakland to Australia in 1928.

Sir Charles, knighted for that daring flight, branded aside the dangers of the Honolulu-Oakland journey, one of the longest in the world, over which he was the first to fly.

The blue and white monoplane, Lady Southern Cross, swooped like a giant bird from a height of 8,000 feet, cleared the field once and then landed perfectly at a fast speed.

Sir Charles, wearing a blue denim flying suit with a big fur collar, offered the plane up to welcoming stands. There were only two men on the field to greet him, but some 500 spectators already had arrived at the field prepared to await his arrival.

Sir Charles rolled back the covering of the cockpit and out popped his greasematted, somewhat weary but grinning face.

"I would like to have a cigarette, a bath and then something to eat," he remarked.

His hands thrust cigarettes at the aviators, who grinned as the crowd pressed close to the plane.

"I've got the best aeroplane in the world," Sir Charles boasted. "From the time of the take-off at Honolulu, he had no trouble except for 15 minutes about 11 o'clock last night when he bumped into a rainstorm."

That necessitated a short period of blind flying.

### First Criminal Court

Court Room At The Pas Crowded When Sessions Open

The Pas, Man.—More than 200 persons from the mining camps of the north and the cities of the south crowded the rooms and corridors of the community building to attend the first criminal sessions of the court of the king's bench ever held in The Pas, Man. Justice J. A. Adamson, Winnipeg, presided. There were 15 charges and nine indictments on the list.

The charges arose out of the strike at Pin Flon on June 30.

### Rocket Mail Test

Trieste, Italy.—A steel tube was rocketed from the side of a mountain near here, and landed undamaged in a valley 2½ miles away, with a cargo of 1,000 letters. The demonstration, testing a specially means of transporting mail between points, was termed a success by its inventor, Gerard Zucher.

## Labor Makes Sweeping Gains In Municipal Voting All Over England

London.—Labor registered sweeping gains in returns available here from municipal elections held all over England. The heaviest losses were suffered by the Conservatives.

The results were watched with keen interest because the elections are regarded as an unusually important test of public opinion in view of the probability of a general election next year.

The results in London district showed a strong swing to the Labor side but in many municipalities in that district the turnover still left the municipal reform party ahead.

The municipal reform candidates are broadly classified as Conservatives in that district the turnover still left the municipal reform party ahead. With its results complete throughout England and Wales, the results showed Labor had made 263 gains against eight losses. The Conservatives had gained 13 seats against 109

### Discuss Meat Imports

Britain Submits Memorandum For Dominion With Dominion

London.—Conversations between British representatives and delegates from the Dominions concerning the United Kingdom's meat imports were resumed at the Dominions office and it is understood the Britons submitted a memorandum which will form the basis of future discussions.

The memorandum, it was learned, has been called over to the discussions of the various Dominions for their observation. Meanwhile discussion on the question of vital significance to British farmers as well as to the Dominion, has been adjourned for at least a fortnight.

Canada and the other Dominions were represented either by the high commissioners or their representatives. Walter Elliott, minister of agriculture, and J. H. Thomas, dominions secretary, with other British government officials were also present.

### Completes Long Flight

Melrose And Hanson Reach Melbourne On Monday

Melbourne, Aus.—C. J. Melrose, the solo Australian, and Lieutenant Hanson, the Dane, left had completed the London-to-Melbourne flight Nov. 1st, coming in seventh and eighth, respectively.

When Melrose buzzed between the pylons at Flemington race-course his reputation for coolness was considerably enhanced. Tagging behind him came the tale of how when he was lost 18 miles from Charlville he landed and bailed a passing motorist.

"He's a casual customer at right," said the motorist later, adding his verdict to that already expressed in London a month ago when the flyer stepped from the cockpit after an eight day and nine hour flight from London with a little restation as if he had made a hop from the nearest airport.

### For Another Speed Record

Malcolm Campbell Preparing Bluebird For Trials At Daytona Beach

London.—The remodelled Bluebird racing car which Sir Malcolm Campbell expects to take to Daytona Beach, Fla., early in January for another assault on his own world record of 272.16 miles an hour is rapidly taking shape in his workshop on the outskirts of London.

Although declining to reveal the scope of the alterations until they are completed Sir Malcolm, who is 46, told the Associated Press the new Bluebird would look "quite different from the old."

"I have real hopes of beating the present record and possibly exceeding 300 miles an hour."

### Gift Acknowledged

Winnipeg.—Hon. W. R. Chubb, Manitoba minister of public works, expressed gratification for the kindness of the people of Oliver, B.C., in sending a carload of fruit and vegetables for use in Manitoba's drought area.

### Probe Munitions Sale

British Government May Investigate Private Manufacture Of Arms

London.—The British government has decided to establish an inquiry into the private manufacture and sale of war materials, it was stated in political quarters. Official confirmation, however, was lacking for the present.

The Daily Mail said the government's decision was partly a result of the senatorial inquiry at Washington and also partly because of a conference to discuss the manufacture and exportation of arms with a view to securing a convention establishing international control.

It was believed the government also would propose other nations join a conference to discuss the manufacture and exportation of arms with a view to securing a convention establishing international control.

Such a conference, it was suggested, might take the place of the disarmament conference.

Announcement that these steps have been determined upon, it was stated, will be the government's answer to labor's demands in the House of Commons, and suggestion of the admiralty for an independent inquiry into the placing of contracts for naval construction.

### Ottawa Conference

Meeting Of Provincial Premiers May Not Be Held This Year

Ottawa.—Possibility of provincial premiers agreeing on a date for the proposed conference with the Dominion government on constitutional amendments appeared to slim that Prime Minister Bennett advised those who were particularly anxious for the conference to go forward that there seemed little likelihood of getting together this year.

While several of the provinces were anxious to meet at Ottawa for the Dominion government in an effort to agree on amendments and methods of making amendments to the constitution, there seemed little likelihood of getting together this year.

With Saskatchewan's provincial legislature meeting in a few weeks, Quebec's early in January and the federal house likely to assemble in January also, there was a possibility, if not a probability, that the conference would not be held at all in the near future.

### Nothing To Conceal

Britain Prepared To Give Every Assistance To Arms Inquiry

London.—The British government, having "nothing whatever to conceal," plans to give all facilities as promptly through to air the international arms traffic situation.

A statement Prime Minister Ramsay MacDonald made in the House of Commons indicated Great Britain, several of whose armaments firms were mentioned in the Washington arms inquiry, is desirous of having the entire situation searched and reviewed.

The prime minister's declaration that the government has "nothing whatever to conceal" followed hard on the heels of assertions by Sir Bolton Eyre-McNeill, first lord of the admiralty, that allegations that Vickers-Armstrong, British munitions firm, "tend in the admiralty," were untrue.

### Asks For Large Sum

Toronto.—John Langley, young Toronto socialist, is seeking \$74,000 in a lump sum or \$70 a week for life from the Fidelity Assurance Company because he lost his left index finger. He contends without a finger he is totally disabled as far as his chosen profession is concerned. The company alleges the wound was self-inflicted.

### Trade With Newfoundland

Toronto.—Trade With Canada. Ottawa.—Tariff reductions announced by Newfoundland's commissioner of public utilities, it is anticipated, will have a beneficial effect on Canada's trade with Newfoundland.

In the three months ended June 30 of the present fiscal year, Canada exported merchandise to the value of \$1,633,425 to Newfoundland. Exports of wheat flour, totalling 73,116 barrels, were valued at \$296,106. Imports from Newfoundland during the same three months amounted to \$197,307.

### HOV. H. H. STEVENS RESIGNS

HOV. H. H. STEVENS, Minister of Trade and Commerce, who resigned from the Cabinet on the mass buying issue. The resignation came after his alleged refusal to retract utterances made while chairman of the Royal Commission on Price Spreads and Mass Buying.

### SCORES VICTORY

Herman Trele recently scored another wheat victory—but this time against the elements. Poor weather conditions played havoc with crops in the Peace River district around harvest time, but they descended upon Wemley too late. Mr. Trele had completed his harvest.

### Section Measure

British Government's Inclination To Disfranchise Bill Subject To Change

London.—The government's inclination to disfranchise bill passed through report stages in the House of Commons but several amendments were written into it during the third two-day debate.

An amendment by the labor opposition, providing a search warrant should be issued only by a high court judge and not as originally proposed in the bill by two magistrates, was accepted by the government. A further change was made when the government accepted an amendment providing no prosecution could take place without the consent of the director of public prosecutions.

The bill purports to check distribution of seditious literature among the forces of the crown.

### Baptize Quintuplets

Ceremony Is Performed At Age Of Five Months And Two Days

Callander, Ont.—Solemn ceremonies of baptism of the Roman Catholic church for the Dionne quintuplet sisters were performed at a private service at the Dafoe hospital, Rev. E. T. McNally, parish priest of Carleton Place, officiated.

The ceremony, performed five months and two days after the babies' birth, was a simple one. It was witnessed by members of the families of both Mr. and Mrs. Oliva Dionne, the parents, and others, including Mons. Legros, father of Mr. Dionne; Miss A. Dionne, sister of Oliva Dionne; Dr. A. R. Dafoe, the attending physician, and five godfathers and godmothers.

### Trade With Newfoundland

Toronto.—Trade With Canada. Ottawa.—Tariff reductions announced by Newfoundland's commissioner of public utilities, it is anticipated, will have a beneficial effect on Canada's trade with Newfoundland.

In the three months ended June 30 of the present fiscal year, Canada exported merchandise to the value of \$1,633,425 to Newfoundland. Exports of wheat flour, totalling 73,116 barrels, were valued at \$296,106. Imports from Newfoundland during the same three months amounted to \$197,307.

### Rumors Of Re-Arming Of Germany Intensifies War Scare In France

Paris.—Allegations of Germany's increasing military might intensified the war scare gripping France.

In great measure the fear of conflict, which overshadowed All-Saints Day pilgrimages of the French people to the graves of their war and civil dead, had been based on belief in the approaching plebiscite in the Saar might set off an international explosion.

For the first time since the war the French apparently were not so confident of the crushing superiority of their own leading minister, war Henri Poincaré to seek urgent reinforcements for the nation's weapons of defence.

### Violent Reaction In Germany

Violent reaction in the German press to the announcement that

## Reported Federal Moneys Will Be Advanced Only For Relief Purposes

### Bright Students

Third Grade Pupils In Toronto Can Answer Questions

Toronto.—Two Toronto senior third grade public school classes claimed marked superiority over similar bodies in London, Ont., when several students correctly identified Premier Mitchell F. Hepburn of Ontario.

Major R. J. Blaney, of Wilkinson school, said 15 of 33 pupils in the senior third grade of his school knew R. B. Bennett was prime minister of Canada and that 23 of the same group could identify Premier Hepburn.

Other students had heard of Mr. Bennett but could not describe his office, and two appeared never to have heard of him.

### Section Measure

British Government's Inclination To Disfranchise Bill Subject To Change

London.—The government's inclination to disfranchise bill passed through report stages in the House of Commons but several amendments were written into it during the third two-day debate.

An amendment by the labor opposition, providing a search warrant should be issued only by a high court judge and not as originally proposed in the bill by two magistrates, was accepted by the government. ### Rumors Of Re-Arming Of Germany Intensifies War Scare In France

Paris.—Allegations of Germany's increasing military might intensified the war scare gripping France.

In great measure the fear of conflict, which overshadowed All-Saints Day pilgrimages of the French people to the graves of their war and civil dead, had been based on belief in the approaching plebiscite in the Saar might set off an international explosion.

For the first time since the war the French apparently were not so confident of the crushing superiority of their own leading minister, war Henri Poincaré to seek urgent reinforcements for the nation's weapons of defence.

### Violent Reaction In Germany

Violent reaction in the German press to the announcement that

Toronto.—The Mail and Empire in special dispatch from its London correspondent say the Dominion government will no longer extend loans to the provinces as has been done in the past four years.

All provinces must meet their financial problems henceforth from their own resources, the step being taken to indicate a move toward economic recovery.

Declaring the decision was contained in the reply of Hon. E. N. Rhodes, finance minister, to Premier J. G. Gardiner of Saskatchewan, who sought aid for his province, the paper stated: "Mr. Gardiner has been told that, while the federal authorities will assume responsibility for relief in the drought area on the grounds conditions there cannot be a national calamity, no federal money will be forthcoming for purposes of provincial relief and the heavy financial burden the government is carrying were given as reasons for the decision."

Improving conditions which would be reflected in provincial recovery and the heavy financial burden the government is carrying were given as reasons for the decision.

It is understood a proposal has been forwarded to Premier Gardiner that an official of the finance department be placed in charge of administration of federal moneys later may be expended in that province in the future.

No details of the plan have been made public. It is understood that following the announcement that an emergency grant would be forwarded at once and a formal plan submitted later, Finance Minister E. N. Rhodes worked out a plan which was later submitted to cabinet.

The plan, it is understood, was to assist the province to meet immediate requirements and co-operate in a determined effort to put Saskatchewan's finances on a more stable basis without further recourse to direct gifts of money from the federal treasury.

It is considered very unlikely that any further federal moneys will be for purposes other than relief of actual want and distress.

Beyond that it is understood financial assistance will be granted only if the economic life of the province is placed under Dominion control. As an intermediate measure it is expected attempts will be made to have the province agree to a joint supervision with federal government officials working closely with the provincial administration in administering the financial affairs of the province.

### Planning Arms Inquiry

May Investigate Private Manufacture And Sale Of Materials

London.—The British government has decided to establish an inquiry into the private manufacture and sale of war materials, it was stated in political quarters. Official confirmation, however, was lacking for the present.

The Daily Mail said the government's decision was partly a result of the senatorial inquiry at Washington and also partly because of a deadlock in the disarmament conference.

Prime Minister Ramsay MacDonald said the government "has nothing whatever to conceal" when asked if his attention had been called to "certain evidence" before the United States senate arms inquiry.

### Trade With Newfoundland

Toronto.—Trade With Canada. Ottawa.—Tariff reductions announced by Newfoundland's commissioner of public utilities, it is anticipated, will have a beneficial effect on Canada's trade with Newfoundland.

In the three months ended June 30 of the present fiscal year, Canada exported merchandise to the value of \$1,633,425 to Newfoundland. Exports of wheat flour, totalling 73,116 barrels, were valued at \$296,106. Imports from Newfoundland during the same three months amounted to \$197,307.

W. N. U. 1971

# Great Hunt For Gold In The History Of Canada Has Been Carried On Over Wide Area

A season that brought what is believed to have been the greatest hunt for gold in Canada's history is drawing to a close. No figures are available to show the exact number of prospectors and assistants who struggled through often inhospitable country, but a careful approximation indicates a total of about 18,000.

Increased prices for the yellow metal spurred prospectors' activity. An added factor was extensive use of aeroplanes, which provided access to new districts and revealed existence of still more. Aerial photography, it is said, has revolutionized the metal mining industry.

Pictures taken from speeding aeroplanes tell experts much. The topographical survey of the Department of the Interior produced 40,000 aerial photographs during the summer. From these, most of them taken in Northern Manitoba, Athabasca, Great Bear and Great Slave regions and in the Nahanni district near the Yukon boundary, maps are being developed. Planes of the Royal Canadian Air Force carrying aerial surveyors made flights over the famous Long Lac district in Northwestern Ontario. Some flights were made in other provinces. Aerial photography this year was designed to help gold seekers.

Luck, prospectors and geologists say is still the most important factor in the hunt for gold and less valuable metals. Once a tree was blown down. Its root was exposed, surrounding soil and bared what was supposed to be one of the richest veins ever discovered in Canada. Last summer a prospector stepped on the shore of a lake because a high wind endangered his canoe. While he waited for the storm to abate he discovered what is regarded as one of the most important finds of the year. Such incidents said to make prospectors superstitious.

Aerial photography has removed some of the chance from prospecting. It tells the field man what rocks contain no gold and the territory where the soil, or what miners call "overburden," is too deep for them to find workable veins, even if they are rich. They help him concentrate efforts where it is most likely to succeed.

Pictures show granite formations in which metals are supposed to be found, and, on the other hand, indicate geological "faults" and great fractures where profitable mineralization is more probable.

Stereoscopes placed over the pictures show the valleys and hills in relief. After discovery of the topography study of the pictures helps in development, as it shows the contour of the country and indicates the best route for a road and other advantageous location for a mill.

In the files of the topographical survey 600,000 negatives are kept, and a sufficient number of prints are available to prevent any possible shortage.

## Got What She Wanted

### Action Of New York Girl Would

Seem Justified, Experts Say

Another story of an individual bucking the tide of big business is told us by a young lady who wanted six buttons. Simply six buttons of a certain size. She found the type she wanted at Altman's, but told the girl she needed a size larger than those on display. The girl asked her what color, and our young lady said the color didn't matter, because she was going to cover them with cloth. Altman's covered buttons, the girl said, and would be pleased to do the covering. The young lady said she'd like to cover her own buttons, and in that case, the girl said, she couldn't sell the buttons. Altman's never sold buttons for covering. Then our young lady drew herself together and told a little white lie. She would take six red buttons, and wouldn't ever dream of recovering them. The girl said them—The New Yorker.

## More Radio Sets Sold

Not only were the radio sets sold in Canada during the first six months of 1934 more numerous than the sales during the same period of 1933, but they were also of a higher class. The total value was \$2,165,000, compared with \$2,027,000 a year ago, the average value (factory prices) being \$44 and \$39 respectively. Over 8,000 of the sets sold were for automobiles.

Developed in England, a new type of autograph having neither wings nor rubber can hang motionless in the air and land on a tennis court.

## Dangerous Policy

### Restoration Of The Dead Experiments Should Not Be Applied On Human Subjects

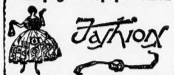

Raising of the dead is no great feat in the opinion of Professor Veylon E. Henderson, chief of the department of pharmacology at the University of Toronto, but is a dangerous practice when applied to human beings.

Dr. Henderson revealed university research workers frequently had resorted to life animals apparently dead for as long as eight minutes, not as a trick to raise them from the dead but because success of experiments often depends on the subject remaining alive.

Animals such as dogs and cats, he said, had frequently been restored after over-doses of anaesthetics apparently killed them. The same method of restoration, he declared, had been applied to human beings killed by carbon monoxide gas poisoning, but the subjects frequently became idiots.

"We get these carbon monoxide cases," he said, "but the brain has been impaired and, in this respect, this tendency becomes more and more pronounced."

## Winnipeg Newspaper Union

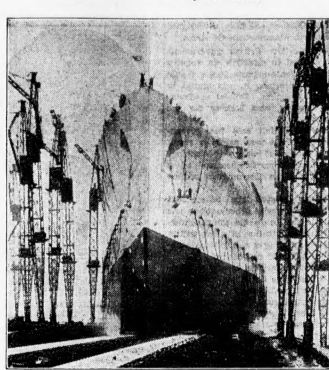

By Ellen Worth

A wholesome family life holds many races together. Nations crumble when the sanctity of the home is disregarded or social laws are abrogated. It is not unlikely the Soviet Union of Russia may reach that phase alone for the Bolsheviks or new dealers there are playing with fire. In discussions in Russian newspapers the young communists are asking if it is possible to continue the family organization and at the same time discharge their regimented duties to the state. The burden of the correspondence is the complaint that the family by the community leaves neither nor nor women sufficient time to develop a wholesome and affectionate family relationship. Some frankly ask why, if it interferes with the discharge of the duties imposed by the state, family life should not disappear at any rate for the present. The appalling implications of this suggestion show how far the process of regimentation has diverted the mind of Soviet youth—Brandon Sun.

"They're free through in London," said Mac. "I lost a shillin' in the Strand and I went to the police. Next mornin' I went to search again and they'd got the coin up!"

## LAUNCHING OF THE "QUEEN MARY"

A splendid view of the launching of the Cunard White Star Liner, Her Majesty, Queen Mary, very graciously performed the ceremony of naming the new vessel. Our photograph shows the great size of the ship, which has an overall length of 2,915 feet. The height from the keel to the masthead is 234 feet.

## Family Life In Russia

### May Be Wrecked By Duty Of Citizens To State

A wholesome family life holds many races together. Nations crumble when the sanctity of the home is disregarded or social laws are abrogated. It is not unlikely the Soviet Union of Russia may reach that phase alone for the Bolsheviks or new dealers there are playing with fire. In discussions in Russian newspapers the young communists are asking if it is possible to continue the family organization and at the same time discharge their regimented duties to the state. The burden of the correspondence is the complaint that the family by the community leaves neither nor nor women sufficient time to develop a wholesome and affectionate family relationship. Some frankly ask why, if it interferes with the discharge of the duties imposed by the state, family life should not disappear at any rate for the present. The appalling implications of this suggestion show how far the process of regimentation has diverted the mind of Soviet youth—Brandon Sun.

"They're free through in London," said Mac. "I lost a shillin' in the Strand and I went to the police. Next mornin' I went to search again and they'd got the coin up!"

## Manitoba Pension Plan

### No Change In System Contemplated By Government

Changes in the Old Age Pension Act in Ontario proposed by Hon. David Craig, minister of public welfare, appeared to be a move toward the system now in effect in Manitoba. K. K. Newcomb, administrator of Manitoba old age pensions, states. In Winnipeg applications for old age pensions were made to the social welfare commission. In all other Manitoba towns applications were made to municipal councils. Those whose applications were rejected may appeal to Mr. Newcomb for a hearing.

Mr. Newcomb said he had no reason to believe any changes in the system were contemplated by the provincial government at present.

While Canada is finding new markets for dried milk products, Russia is making a bid to increase her exports in this line. A large factory with an annual capacity of 5,000 tons of dried milk has been set up at Yalutorovsk on the Trans-Siberian railway in a district in the far east some 6,000 miles from the war for its dairy cows and butler.

Undaunted by the lack of snow in Australia, youths of Sydney are asking on sandhills.

## The SNAPSHOT GUILD

Your Own "Candid Camera"

A "candid camera" snapshot, replica with the brilliant atmosphere of an unhappy moment. It tells the whole story.

Some magazines and newspapers make a great to do about "candid camera" pictures, so called because they portray the great and near-great, in unguarded moments and poses. Many "candid camera" shots have been made at banquets, receptions, conferences and other affairs. They are—sitting, talking, yawning.

These candid snapshots are usually made with very small cameras, equipped with exceptional fast lenses and shutters. Such cameras do not need brilliant light, and they can be handled so easily that they do not become conspicuous.

Many "candid camera" shots have been made at banquets, receptions, conferences and other affairs. They are—sitting, talking, yawning. These candid snapshots are usually made with very small cameras, equipped with exceptional fast lenses and shutters. Such cameras do not need brilliant light, and they can be handled so easily that they do not become conspicuous.

It is essential that you use the fastest kind of film for these snapshots for you usually have to work under some handicaps. Modern super-sensitive film is remarkable stuff, but it is not so fast. In fact, it is a fast film, a clean lens working at the widest aperture, a watchful eye and quiet, unobtrusive camera work—these are the only essentials for many "candid" snapshots.

JOHN VAN GULDER.

# Indian States Pay High Tribute To Lord Willingdon By Erecting Statue In His Honor

## B.C. Salt Fish

### This Is The Latest Commodity To Come Under Marketing Act

Salt fish from British Columbia waters is the latest commodity to come under a marketing scheme. Announcement was made of the approval by the cabinet of a scheme for the marketing of salt herring and salt salmon produced in British Columbia.

The Dominion marketing board under the Natural Products Marketing Act has a number of other schemes under consideration, including livestock and poultry schemes for Western Canada.

British Columbia, however, leads all provinces in taking advantage of the act, for besides its salt herring and salmon products it now has its red cedar shingles and its tree fruit under regulation of marketing boards.

The scheme was adopted on the application of the meat, oil and salt fish section of the Canadian Manufacturers' Association in British Columbia. The local marketing board will consist of two members appointed by the organization, two by the Canadian Salt Fish Exporters' Union, and a chairman to be appointed by the deputy minister of fisheries for the province.

The local board will have power to regulate the time and place of the marketing of the regulated products and the quantity and quality to be released for marketing. It may also conduct a pool for the equalization of prices.

The livestock scheme is proposed by the Saskatchewan Co-operative Livestock Producers, Limited, and applies only to that province, but similar schemes are being prepared for Manitoba and Alberta, and all are designed to fit into a general plan of central livestock marketing over the whole of Canada. Opinions of the producers are being sought as they proceed further.

The provincial boards would be linked through a sales agency and all products apart from those for local consumption would be handled by the sales agency. All producers would be registered, all sales pooled and all packers and dealers, whether wholesale and retail, licensed.

## Agricultural Economy

### To Preserve Information Of An International Character

The International Institute of Agriculture at Rome is planning to ask 74 governments for data on which to base recommendations for world planning in agricultural economy.

Its move followed unanimous approval of the proposal made by Henry Charles Taylor, United States permanent delegate to the institute, at the organization's annual meeting along lines of international planning.

As soon as possible the institute will begin its new work, rendered possible by the resolution of the institute's annual meeting last year. Taylor's proposal. It declared the action had been taken "as a means to improve the quality of work and to meet the needs of the time for agricultural information of international character."

## Interested In Kitchens

### King George Likes To Cook When He Is Allowed

An amusing story of King George is told by Philip Inman, managing editor of *Charing Cross Hospital*, a book, "Oil and Wine," just published.

The King, he writes, was passing along the corridor to one of the wards where he stopped before the door of the ward kitchen.

"May I go inside?" the King asked.

The door was opened and revealed a nurse bending down before a gas oven. The King took in everything at a glance and then said he was interested in kitchens. I sometimes do a little cooking myself—that is, when I'm allowed."—New York Times.

Write: "No, I didn't see a button on your trousers. I was too tired. Which is more important, anyway—your wife or your trousers?"

Husband: "Well, there are places I can go to without a wife."

The South Atlantic ocean contains islands which sailors have used for years, but have never seen. They are in a perpetual fog.

Approximately 4,000,000,000 pounds of tobacco are produced in the world annually.

It is an honor almost unique that the princes of the Indian states are paying Lord Willingdon, viceroy of India, they have subscribed funds with which a statue in his honor will be erected in New Delhi—"to express," in the words of the official announcement, "the high esteem and regard in which the Viceroy is held by the princes generally and to commemorate his long and distinguished connection with the country."

The success of Lord Willingdon's service as governor-general of Canada led his friends to believe he had the qualities demanded by the much more onerous responsibilities of his Indian post, and they have not been disappointed. In a Dominion he displayed democratic dignity, was an upholder of tradition, but not a stickler for form. His authority did not rest upon conventionalities, nor was his influence bounded by the limits of his high office. He went to the heart of the Indian problem, and understanding the Canadian viewpoint, and in every branch of his public service he had the extremely competent cooperation with the country.

In the larger spheres of Indian affairs Lord Willingdon has demonstrated by these same qualities—and by a happy and rare combination of firmness with tact—his right to be ranked with the great pro-consuls of the British Empire. He has done something more than three years ago the country was rent with disorder, the fanatic Gandhi was a power in the land and the centre of disorder, law and unrest, and there was serious resistance to the British plan of broadening self-government of the Indian people as they were educated to accept responsibility for their own administration. Since that time the British have been able to do so much for India, and the picture today is a vastly different one. Gandhi is in his cage, his following largely gone. The country is peaceful. He has clearly led us into the new columns.

And this has been accomplished, we imagine, largely because Lord Willingdon was a careful and shrewd and, indeed, because it is known he will not tolerate injustice, because his policy in India was sound. It is founded on common sense—Ottawa Journal.

## Leads In Literary Output

### Russia Claims Production Of Greatest Number Of Books

Soviet Russia, a generation ago the most illiterate country of Europe, has been surpassing all other nations in the production of books. It has surpassed not only every other nation, but even the United States and Germany combined.

Just recently 500 Soviet authors met in the first All-Union Writers' Congress, and laid down the general lines of Russian literature for the future.

In connection with their meeting, figures have been published that show the vast progress the Soviet has made in book publishing since the revolution.

Not less than five million books have been issued within the past 15 years.

Within the past five years the circulation of the writings of Maxim Gorki, the Soviet laureate, has been 18,963,000 copies.

Sholokov, author of "Still Flowers the Don," has sold 2,106,000 books.

And even poetry, ranking well below prose in other countries, has vast popularity in Russia. Official figures place the circulation of Demyan Bedin's verse at 740,000.

"The yellow meal worm is a pest that is easily dealt with in winter time in Canada. With the meal or flour placed outside in a rat-proof receptacle, zero temperature will kill all the pests in a night. If the temperature is above freezing, add green Fahrenheit, it is better, says the Dominion Entomologist, to leave the food out two days.

## Popular Anyway

Modern science has struck a blow at apple pie. Dr. Carl F. Pellers of the University of California, says apple pie contains only about one-fourth as much vitamin C as the fresh apples with which the pie was made. Vitamin C is a mysterious quality in a food which prevents scurvy.

Great Britain and Ireland produce only enough meat to supply London's population with 3.2 ounces of beef, 29 ounces of mutton, 10 pounds of ham, and 2.6 ounces of pork per head each week.

## Canada's Egg Market

Grading Regulations Improved Quality And Ensured Good Prices

Canada is the highest priced egg market in the world, and credit, in some measure, for this enviable position in these days of low prices for agricultural products must be given to the Canadian egg grading regulations. The egg regulations were designed to improve prices and marketing conditions and the quality of eggs placed in the market. In the various activities of the egg inspection service none is regarded as more essential than that of preventing eggs of an inferior grade being sold under a higher grade. The quality and grading of eggs in wholesale and retail stores is subject to continual supervision by officers of the Canadian Department of Agriculture egg inspection service.

Supplying Canada's own demands for eggs is a most important business. The total production of Canadian farm eggs in 1933 was approximately 210,850,000 dozen with an estimated value of \$26,345,000. These figures relate only to eggs produced by hens on farms, and not to the eggs of urban poultry. Canadians are generous egg eaters, and during 1933 each person in Canada consumed, on an average, over 21 dozen eggs. Altogether Canadians consumed 229,146,612 dozen eggs, which was equal to nineteen million nine hundred and fifteen thousand eggs of the eggs produced on farms.

## New Toys More Realistic

Streamline Effect Is Being Introduced In Many Ways

Streamlined skates, with a spare roller and a tall light—that is what Santa Claus is going to bring many good kiddies this Christmas. Toys, according to a preview at Santa's workshop at the North Pole, will be more realistic and more durable.

Toy automobiles will have streamlined effects, "pants" over the wheels, and really be a miniature model of the real thing.

Little sister dolls will not be so large, but will have real human hair, flaring eyes and smooth, flesh-colored bodies. Some will be made of tin. Her stove will be electric and there will be a separate switch for the dolls in the oven.

Bicycles, scooters, wagons and velocipedes, too, are following the trend to streamlines. In addition to all these improvements, the new wagons, scooters and other toy vehicles will have pneumatic tires.

The toy makers have done big things for the kindergarten and play centers. Toys this year will have more educational features than ever. Small dolls have just enough weight to give the youngsters good muscle building as he swings them.

Several new adult games are being brought out. "Harkley" is the popular is expected to be "monopoly" in which four to 14 may play. "Sorry," an English game, "igloo" from Japan and "Harkley" for the adult games on the market. Backgammon is due for a comeback.

Due to changes in the money exchange there will be a new Christmas tree ornaments may come more because few are made in the United States. The same holds true with miniature glass dolls, according to workers in the North Pole Toy Shops.

## Teachers Learn About Weeds

Every Sort Grown At School Near Belfast, Ireland

Weeds are encouraged to grow in a garden which is beautifully kept at an elementary school near Belfast, Ireland. Under the guidance of the Ministry of Education 25 teachers are being taught how to teach horticulture to the scholars in the rural area. Every sort of weed is grown in orderly fashion. There are neat little rows of regular garden pests which give the amateur gardener to despair. They are fostered and tended as if they were orchids. By careful examination of the specimens the students get to know a lot about weeds and there will be a great slaughter when they return to their own school gardens.

## Friends Of Japan

Canada is Japan's nearest neighbor and the Japanese people remember the sympathetic understanding which the consensus of opinion in Canada has always manifested toward the general policy of Japan. Hon. Iyemasa Tokugawa, Japanese ambassador to Canada, told members of the Winnipeg Board of Trade:

"Two famous bells, the 'Maria Gloriosa' and the 'Empress', were cast from the metal of 42 Japanese cannon taken by the Germans in the war of 1870.

## Fish Livers Bring Good Price

As A Result Of Research Work Waste Material Now Worth Money

Fish livers were formerly only so much waste, except of livered cod, but research is changing that.

Halibut and swordfish livers, for instance, are now worth money to Canadian fishermen because Research found that they contain an abundance of the same health-building vitamins which give cod liver oil its high medicinal value. The livers, usually shipped in food cans so that they will retain their freshness, are sold to pharmaceutical companies which extract the oil from them and market it in medicinal preparations.

Sales of halibut livers netted Dominion fishermen about \$49,000 last year, quite a tidy sum to get for material that used to be thrown away as useless until a year or two ago, and this year Nova Scotia fishermen are finding a sale for swordfish livers. Swordfish are big fish with big livers so the fishermen are likely to be well off at all events, they are getting something for what used to be worth nothing, and with little extra effort, for swordfish are always cleaned before being shipped to market.

Swordfish are not taken on the British Columbia coast—nor, for that matter, anywhere else in Canadian waters except off Nova Scotia—but it is not the Pacific coast that the Dominion's largest halibut fishery is carried on. It is there, of course, that most of the halibut livers is done. Out of the 250,000 pounds of halibut livers sold from Canadian fishermen last year over 229,000 pounds came from British Columbia sources and the remaining quantity from Nova Scotia. The average price, both East and West, was twenty cents a pound and this year's price is understood to be much the same. Sales of halibut livers have been progressing for several years, but it was only recently that the vitamin content of swordfish livers was determined and a market for them thus created.

## Praise For Canadian Rockies

More Magnificent Than Alps States World Traveler

"If the people of Europe and United States only knew of the magnificent beauty of the Canadian Rockies and the beauties of the Pacific coast, your tourists would be numbered by millions instead of thousands," said this was the impression voiced by H. V. Morton, Sunday editor of the New York American, who, with Mrs. Morton, traveled the C.P.R. Seattle route, terminating their first tour of Canada.

"It is," he said, "while I have travelled extensively over the world this is my first visit to Canada, and now I am beginning to realize that the youngsters go to the Rockies to see the Rockies. The Alps cannot compare with the Rockies for the grandeur and beauty. I am certainly looking forward to seeing them again."

## Hardships Not Known

Suffering Caused By Depression Not Reflected In Relief Lists

The relief lists don't anywhere near represent the total loss by unemployment and the full burden of hardship now being borne by the general public. Hardly a man anywhere who is earning a living—a very much depleted living as a rule—but has felt compelled to assume, from motives of compassion, the burden of some less fortunate ones.

It is easy to be glib and say that the jobless should have saved for a rainy day—a rainy five years for most of them—and that "it's always possible to get along somehow." But how does it work out in actual life? The half has never been told of the suffering and deprivation in Canada caused by our man-made depression. Certainly the relief lists, appealing to us, do not reflect it—Edmonton Bulletin.

## A Quick Thinker

"Who can those ferryboats I tripped over coming down the stairs just now?"

The landlady gave a fierce look. "Ferryboats, indeed?" she gasped. "I'll have you understand they are my shoes."

The boarder gulped uneasily. "Did I say ferryboats?" he hastily asked. "I meant 'ferryboats'."

First Gossip: "What does Miss Spaulding remind you of?" Second Gossip: "A peninsula, of course."

First Gossip: "Oh, yes, a narrow neck stretched out to sea."

## VIRTUAL DICTATOR OF CUBA

Col. Fulgencio Batista

One man holds turbulent Cuba in the hollow of his hand, and that man, according to reports, is Colonel Fulgencio Batista. Only thirteen months ago Batista was a sergeant in the rebel army under former President Machado, and now he commands the army. To be sure, Cuba has a constitutional president, Carlos Menéndez, but Colonel Batista is the "court of last resort" in the opinion of political observers. Above are views of the capital of Havana, Colonel Batista, and part of Cuba's defense equipment.

## Ginseng Root Grows Wild

Cultivation Calls For Expensive Equipment And Special Technique

Ginseng root is produced in Canada for export to China, where it has been cultivated for several years, but it was only recently that the vitamin content of swordfish livers was determined and a market for them thus created. When dry, the root is steeped and used much in the same way as other medicinal herbs. Ginseng grows wild over a large part of Canada, and was well known to the early French colonists. Its cultivation is expensive technique and rather the expensive equipment, as it must be grown under shade and soil conditions must approach those found in the forest. It is not until the fifth or sixth year from the planting of the seed that the root attains sufficient growth for pulling and drying for market. Its cultivation is highly localized but is reported profitable where suitable conditions are reproduced.—Toronto Saturday Night.

## Big Poultry Plan

American Interests Reported To Be Sponsoring Plan

Chicago and New York financial interests are reported sponsoring a scheme to erect a \$500,000 poultry farm, at Clinton, Ont., for the production of eggs.

The sponsors of the poultry plant were reported to be considering employing 400 persons in manufacture of salt, soda, acids and synthetic ammonia.

Twelve per cent. of the motor licenses issued in England are held by women.

Alaska's flag carries the symbol of the Great Dipper and the Polar star.

It's easy to be glib and say that the jobless should have saved for a rainy day—a rainy five years for most of them—and that "it's always possible to get along somehow." But how does it work out in actual life?

The half has never been told of the suffering and deprivation in Canada caused by our man-made depression. Certainly the relief lists, appealing to us, do not reflect it—Edmonton Bulletin.

"Who can those ferryboats I tripped over coming down the stairs just now?"

The landlady gave a fierce look. "Ferryboats, indeed?" she gasped. "I'll have you understand they are my shoes."

The boarder gulped uneasily. "Did I say ferryboats?" he hastily asked. "I meant 'ferryboats'."

First Gossip: "What does Miss Spaulding remind you of?" Second Gossip: "A peninsula, of course."

First Gossip: "Oh, yes, a narrow neck stretched out to sea."

## Advising The Farmer

Arm Chair Critics Usually Have Lots Of Ideas

How easy it is for some persons with imagination and gifted with a flow of words to sit in a comfortable arm chair, feet cocked on a desk and dictate to a stenographer instruction how a farmer can better his conditions. One of these effusions recently reached our desk and here it is:

"The application of engineering to agriculture has for its purpose the utilization of engineering principles, methods, and equipment to decrease the unit costs of farm products, to reduce the amounts of income labor in producing crops and caring for livestock, and to increase the satisfaction of farm living."

"What a wonderful thing this must be for the farmer. The application of engineering to farming is going to show him how he can the more easily, plow, sow and harvest; how best to unload his grain in the mow; cut and haul the corn into the silo; milk his cows with the minimum of energy in the cheapest manner; weed the turnip patch and get the weeds out of his corn and potatoes while the farmer's wife is to be told how to perfume her multiplicity of chères before the house as so to increase the satisfaction of farm living."

If the authors of some of the national stuff emanating from city offices were to write their articles, leave them on the desk until the following morning, and then read them before they began the work of the day, we feel sure much of it would find a place in the wastepaper basket.—Perry Expositor.

## Something To Remember

Nations Could Learn Much From "Slow Poke England"

When ever you hear people talking about "slow poke England" and its tendency to be cautious, here is something to keep in mind.

Since 1929 the world has been passing through the worst business depression it has ever known, yet as Herbert N. Casson, Canadian editor of the London magazine Efficiency points out, in that period only one British department store had closed its doors and not one of the other department stores has had even one year in which it failed to make a profit.

In that period not one railroad anywhere suffered a loss. One large hotel has been torn down to make way for an office building, but not one large hotel has gone into bankruptcy. In not one bank has failure occurred. Canada can match that record as regards banks, but in other particulars it can hardly claim to do so, while some other nations will be hard put to match it at all.—Sault Daily Star.

## Fortune Teller Was Right

Foretold Succession Of Sultan Faud In Egypt To Thron Of Egypt

When a fortune teller in Paris informed Prince Faud he would die a king he laughed. He was far from wrong. In 1931 he was crowned king. In 1931 it looked for a moment as if the prophecy might be true. A king was wanted in Egypt. Italy was said to support his candidature. But a German prince was chosen.

Then came the war. His nephew, the Khedive Abbas Hilmi, was deposed. Prince Faud's elder brother, Prince Hussein, became Sultan. Two years later he died. Sultan Hussein's son renounced his rights. Prince Faud succeeded. When Britain abolished the Protectorate in 1922 Sultan Faud proclaimed himself king. The Paris fortune teller was right after all.—London Daily Telegraph.

## Par-Mutuel Betting

Less Money Wagered On Horse Racing This Year

Par-mutuel betting in Canada this season was \$20,974,000, a decrease of \$4,163,100 from 1932, was reported by the department of agriculture. This resulted from 295 days of racing divided between 40 meetings. The total amount was a two-day meeting at Red Deer, Alta., \$229.

With four tracks and 56 days of racing, Toronto led the wagering with \$8,965,000, almost \$1,000,000 less than last year. Winnipeg was second with \$2,408,000 from three tracks and 35 days of racing; Vancouver, third, \$2,228,000, three tracks, 42 days; Montreal, fourth, \$1,201,800, three tracks, 42 days, and Calgary, fifth, \$580,000, two tracks, 21 days.

The function of the liver is that of acting heat when the body is chilled or at the onset of fever, according to Dr. Henry G. Barbour of Yale.

Dundee has banned Sunday concerts for charity.

## Superstition In China

People Seek To Lure Evil Spirits To Death Before Cars

There is no congestion in town traffic in Kwetsh, Honan, China, as there are in only two automobiles in the city, that belonging to the St. Pierre hospital and that of the city magistrate, but nevertheless a driver must be very alert to avoid accidents, for driving through the country groups of women and children run constantly across the road immediately in front of the car. It is not a game, but a serious business, the hope being that any evil spirit trailing them will be run down by the car if they get over just in time to save themselves but have the spirit still on the road.

Such is an example of the superstition that reigns in the hearts of the people of the district, the story of which formed part of the vivid and memorable address given in an Ontario city by Dr. R. F. Brown, graduate of the medical school at the University of Toronto, who has been at St. Pierre's hospital at Kwetsh for the past six years.

Other examples of the superstitions of the people were also told by the speaker. In the hope that the extreme heat of last year they were surprised at the unusual sight of the gods being placed in the fields, made of wood and paper gods, and were told that the people were giving the gods a taste of the weather they were given in the hope that, experiencing the heat themselves, they would see the necessity for sending rain, and once rain came, the drought and prolonged drought, the south gate of the walled city was locked for some time, the people believing that the rain spirits were in the ground, the north gate and determining that if they did rain in they would not be allowed to get out until they had given rain.

## Cause Needless Tragedies

Curious Customs Hinder Those Who Could Help In Accidents

Louis Barbour, the brilliant little foreign minister of the St. Pierre hospital, told of a case in which a child was killed in his arm. The deepest shadow of that tragedy lies in the fact that his death from his wound could seemingly have been prevented. Hysteria and morbid curiosity on the part of the crowd delayed his arrival at a hospital, an extraordinary neglect of elementary first-aid such as a handkerchief tightly twisted above the wound, allowed his life to ebb away during the slow passage through tumultuous streets.

France bears the grief and burden of the war, but the support of an excited crowd and the distracted attendants on her minister. But every one of us should take to heart again the old and newly demonstrated lesson that in public disaster clearance should be made for the cool-headed and the calm. Calm that gathers at scenes of accidents and fires are a serious hindrance to those able to give real help. The gaping spectator is both a menace and a menace.

If one cannot aid in time of emergency, one should at least keep out of the way of those who can.

## Likely To Take Months

Establishment Of Canada's Central Bank Means Much Work

Establishment of the Bank of Canada is still a matter of time, and probabilities are that the organization will not begin to function until February next year. Subscriptions to the stock of the bank closed some time ago, and this was followed by a process of allocation. The policy of the government is to ensure that the bank is not a monopoly, but among all classes of the community.

This has increased the difficulty of those handling the situation and has also complicated the difficulty of the shareholders in the matter of electing directors to the bank. However, the bank is expected to be published in the official government periodical in order that shareholders may ascertain who among them are to have a share in the bank. The statute provided for seven.

Wife: "A fine husband you are. Why, you can't even keep me in clothes."

Husband: "No. And I bought you a home, and I can't keep you in that either."

Tragic Cup—"You're no good, Lady. Use your noodle."

Lady—"My goodness! Why is it I've pushed and pulled myself into the car?"

Catty—"My goodness! I could give you a wrinkle or two."

"I'm sure you could, darling, and never miss them, too."

## CHAPTER IV.—Continued

## WHAT TO DO ABOUT "Acid Indigestion"

A CASE THAT RELIEVES THE GASTRIC IN A FEW MINUTES

Many people who think they have "weak stomachs" or "indigestion," doctors say, suffer in reality from nothing more serious than acid stomach. And this common ailment can usually be relieved now, in minutes. All you do is take familiar Phillips' Milk of Magnesia tablets. This acts to almost immediately neutralize the stomach acidity that brings on your trouble. You feel like a new person.

Try this just once. Take either the familiar liquid "PHILLIPS", or the new "PHILLIPS" Milk of Magnesia Tablets. But watch out that you get the Genuine PHILLIPS' Milk of Magnesia. Made in Canada.

**ALSO IN TABLETS**  
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores, grocers, etc. Each one equivalent of a teaspoonful of genuine liquid Phillips' Milk of Magnesia.

**PHILLIPS' Milk of Magnesia.**

## THE TENDERFOOT

By GEORGE B. ROONEY.  
Author of "The Coronado Trail," "The Canyon Trail," etc.

## SYNOPSIS

"You've fallen now to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur mine has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin." But Keene decided to go see what was happening for himself—not on Gerald Keene, half owner of the Four-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wilderness outfit. Dad Keene, desert rat and luckless prospector till now, is returning to tell Dustin and Spike Goddard, owners of the Broken Spur mine, who had grabbed him, of his discovery of a rich gold mine, as shown on the map of the ore. He sees Broken Spur men rustling Hour-Glass cattle and protests against it. Spike Goddard and Sam Dustin, feeling the old prospector's tale, spit the things he has seen as to the branding of Carr's cattle, and to get him to show them the location of the mine and then to kill him. (Now Go On With The Story)

## Great RADIO CONVENTION for UNWIRED HOMES!

● A marvelous new source of radio power—brings a new type of radio—with the quality of the finest electric set you have ever heard—and electric set convenience!

**AIR-CELL RADIOS**  
● Are built to operate with the new EVEREADY Air-Cell "A" Battery, an amazing electrical unit that re-energizes itself for at least 1000 hours—which, at 3 hours a day is almost a year's service in the average household.

**NO MORE RECHARGING**  
● You have no more battery recharging. Every program comes through clear as a bell for the entire life of the Air-Cell Battery.

But don't confuse the new Air-Cell Radios with ordinary battery-powered sets. They are as unlike the old sets as anything can possibly be. They are new in perfect reception—in easy operation—in low keep cost.

Air-Cell Radios are now being built by all radio manufacturers—designed especially for the EVEREADY "A" Batteries. Ask any dealer for a demonstration—your interest will be well repaid.

Dustin swung about to face a gray little figure that stiffened at sight of him. Sam Peters had been cashier of the Seco Bank for more than thirty years. Scotch by descent and cautious by nature, only once had he ventured to extend his activities beyond Seco. He was like King's muskrat that all his life tried to muster courage to run to the middle of the floor. Peters mustered that courage once. . . and Dustin caught him with a loan of five thousand dollars on his house. That loan saved Peters his bank job, and it made him the bond-slave of Sam Dustin.

"Just a moment, Peters. . . " Dustin drew him aside. . . "How much money does old man Carr owe the bank? I've got to know."

"The bank?" Peters hadn't paid any interest on it for a year. It's about twelve thousand dollars right now. And I'll tell you more. . . Old man Pegram better let go all holds on it just as soon as he can. Old Carr's in bad ways."

"How much is the note for?"

"Well. . . Old Carr hasn't paid any interest on it for a year. It's about twelve thousand dollars right now. And I'll tell you more. . . Old man Pegram better let go all holds on it just as soon as he can. Old Carr's in bad ways."

Dustin's heart gave a great jump. This was better than he dared hope. He stared hard at the little figure before him.

"I've got a five thousand dollar note of yours, Peters," he said. "It's secured by this house and lot, eh?"

"Yes, sir. That's no more. . . something hard in his throat seemed to choke the little gray chestier."

"That note of yours is due next week. I want that note of Carr that Pegram's got, see?"

"I . . . I . . . I swear I don't see it. I can't do it. It's Mr. Pegram's private business. I . . ."

More than ever did Sam Peters regret that accused by him in what was to be a ruinous and his old wife from any danger of poverty. He made one final wriggle for escape.

"As matters stand, I don't see how it can help you to own a half share of the Hour-Glass ranch," he said.

"Half of it? You're a plain fool, Peters. I'll own the whole place, Soda Springs and all," he added. "Old man Carr owns the Hour-Glass, don't he?"

"He owns half of it," said Peters. "That's all. When old man Peter died, he left the Hour-Glass half to Joe Carr, his old partner, and half to his sister's son, one Gerald Keene. When Carr wanted to borrow on his half of the place, we had to look up the will. That's how I know I saw the will. It says that if either

Carr or Keene dies, his half goes to the survivor. . . "Dustin was breathless. . . "Say that again."

"Peters said it again and Dustin, sure that he had not misunderstood, let go a smoke-scented profanity. It was not the positive profanity of good-nature but the virulent overflow of one who fears he has been hurt and who is not sure of the extent of the injury. In one brief kaleidoscope moment the future of his plans seemed sure. If Gerald Keene, the nephew of old Peter Victor, owned half the Hour-Glass then, Sam Dustin, even if he succeeded in ousting Joe Carr, was only getting a new partner when he did not even know it.

He sized old Peters and whirled him about in the moonlight to check. There was but one thing to be done. Too much depended on what old Keene knew! That miserable old desert-rat could send him and Spike to jail for a half a lifetime and Joe Carr would lose his share of the Hour-Glass. Get me?"

"You want to keep a roof over your own wife's head," he snarled. "You buy up for me every scrap of paper that old Carr has signed. I want to own the half-share of the Hour-Glass. Get me?"

Peters gaped helplessly at him. "I mean what I say, you old fool. I swear I don't. Nobody knows. Even Mr. Carr doesn't know. He's been trying to find him through Mr. Burley of the Drovers Bank in Cato but he wrote us that he was handling Mr. Keene's business and that Mr. Keene was travelling somewhere and couldn't be reached just now."

Dustin grunted disbelief but he could do nothing at present. He had plenty of money in the bank and Peter Keene. There was no question of the validity of the check that Dustin wrote at the hotel desk and passed to the gray-faced little nabber who took it slyly. He pounced it, refused a cigar and headed for the bank feeling like a condemned criminal who has received notice of an unexpected reprieve.

"I'm sorry for old Carr," he muttered; "but I can't help it. I can't see Mame go to the Poorhouse and that's what'll happen if Dustin sees that note. Oh, hell! What's the use kicking? But I wish I could put a spoke in Dustin's wheel. . ."

He saw Pegram at the bank who was only too glad to get rid of Carr's note for Dustin's check and he turned that over to Dustin who promptly headed back for the Broken Spur. He found Spike anxiously awaiting him and he was drawn into the office by a nod from his partner.

"What luck, Sam?"

"The best in the world except for one thing. I found out that old Carr does not own all the Hour-Glass. He owns half of it. The other half belongs to one Gerald Keene, nephew of old Peter Victor. If either Carr or Keene dies, the other gets the whole place. . ."

"Well," said Spike who saw no further than the end of his nose. "You call it well, do you? Damned if I do. I can't get at this man Keene. No one seems to know his address. If I could find him, I'd offer to buy his share of the Hour-Glass. One thing is sure now, though. We've simply got to find out from old Dad Kane the exact place where he located that ore."

"I hope you can shut his damned mouth," said Spike passionately. "Ed Raynor, the tax collector, was here for grub and old man Kane began shooting off his face. He was strutting gay and coarse about what he seen 'em doing up in the hills. I headed him off in time and I don't think Raynor caught on to what he was saying. . . What you goin' to do?"

He asked sharply for Dustin, with a sharp little oath, was heading for the bunk-house.

Old Dad Kane, standing just inside the door, was suddenly snatched off his feet and was sent spinning against the wall. He turned like a flash and a rusty old ax-grip, a cap and ball affair, was thrust under Dustin's nose.

"You keep your hands where they're used to bein' . . . In other men's pockets," snapped the old prospector. "What you want? Hey?"

"To shut your fool head and to keep you from lettin' all the world in on what you found. You damned old fool! Don't you know that one word from Ed Raynor'll send a hundred men up Red Water? Come into the house. I want to talk to you."

Wholly angry, wholly incalculable threats at every pore, Kane followed Dustin into the office. Once in the room Dustin turned on him.

"Look here, Dad. . . His very time was wasting for he had time to reflect. . . "It's all my fault. I just couldn't stand seeing our chance of a fortune go glimmerin' just because you talk too damned much. I don't know just what you said but I do know that after a long time in the hills most men's jaws relax. You mustn't give any one a hint that you found pay-dirt in the hills. If you do, we're busted. You knew well enough that one word of gold in Red Water will start a stampede up there. Where'll we be then?"

(To Be Continued)

## North Pole Controversy

Claim Dr. Cook Came As Close To Pole As Admiral Peary

The claim of Dr. Frederick A. Cook to discovery of the North Pole were credited by J. Gordon Hayes, Polar historian, with as much accuracy as those of Admiral Robert E. Peary.

In his book, "The Conquest of the North Pole," published recently, Mr. Hayes said many of Cook's statements "may be accepted as genuine and truthful."

Hear Admiral Richard E. Byrd and Floyd Bennett were said by Hayes to have been the first persons actually to reach the Pole.

"Admiral Peary," Hayes said, "never was within 50 or more miles of the North Pole. There have been many critics of Peary's claim on both sides of the Atlantic, and all disinterested inquirers have come to the same conclusion—that he didn't reach the Pole by this it may be understood he never was within 50 or more miles of its position."

Hayes admits Dr. Cook in 1908 "probably reached at least as high a latitude as that attained by Admiral Peary the following year; that Cook's statements except in relation to his attainment of the North Pole and possibly his glacial island, may be accepted as substantially genuine, truthful and accurate."

When automobiles travel at speeds in excess of 40 miles an hour more power is required to overcome air resistance than when they travel at 20 miles an hour.

Argentina is trying to keep down all imports.

**THE FAMOUS RUBBING LINIMENT**  
Rubbing Liniment is the only one of its kind. Get the large economy size—Also available in smaller, regular size.

**MINARD'S LINIMENT**  
"KING OF PAIN"

Here's a tasty table delicacy for the Fall of the year—Apple Roll, made just at the season when firm, flavorful apples are at their finest. It's better too, than it's made with Purity, the high quality all-purpose flour.

Flour is special, as in staple baking such as bread, rolls, pies and cakes, you'll find PURITY products always uniform.

Western Canada hard spring wheat from which it is milled is selected personally by PURITY Flour representatives. Its quality is maintained always at the same high level. Guesswork is eliminated, and when you use PURITY Flour you'll find that one brand, and the PURITY, is all you need for all your baking.

**PURITY FLOUR**  
BEST FOR ALL YOUR BAKING

**Weekly Newspaper Association**  
was elected held in Regina. A well attended convention of the Canadian Weekly Newspaper Association (Saskatchewan section) was held in Regina on October 26. Mr. H. Gamble, publisher of the Advance, Gull Lake, was elected president for the ensuing year.

Mr. Gamble has been a member of the association for 17 years. Born in Cumberland, England, he served his apprenticeship in the printing trade in the Old Country and came to Canada in 1905. He has been connected with the Gull Lake Advance since 1915.

Mr. Gamble succeeds Donald C. Dunbar, veteran proprietor of the Estevan Mercury, whose 40 years of newspaper experience has won for him the title of "Dean of western journalism." Mr. Dunbar was elected honorary president.

S. N. Zing of the Wapella Post, another veteran of 37 years of Saskatchewan newspaper work, was elected vice-president, and B. J. Dornan, Alameda Dispatch, was re-elected secretary-manager of the association for the twelfth year in succession. Mr. Dornan was given a vote of thanks by association members for his services during his years as secretary-manager.

Appointed as this year's executive were: S. N. Wynn, Yorkville Enterprise; C. W. Holmes, Redoubt Enterprise; O. D. Stitt, Radville Star; H. Berriman, Blaine Lake Echo; J. O. Vopni, Davidson Leader.

**Little Helps For This Week**  
"He that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?"—1 John 4:20.

Old friends, old scenes, will lower the bar. As made of heaven in each we share. Some softening gleam of love shall dawn on every cross and care.—J. Kelle.

It requires far more of the constraining love of Christ to love our cousins and neighbors of the heavenly family, than to feel warm to our suffering brothers in Tuesday or Wednesday. To love the whole Church is one thing, to love, that is to delight in the graces and will to the defects of the person who misunderstands us and opposed our plans yesterday, whose peculiar infirmities grate on our most sensitive feelings, or whose natural faults are precisely those from which our natural character most revolts, is quite another.

A Temple. There has been upon earth, a spiritual Temple made up of living souls, a Temple with God for its light and Christ for its high priest, with wings of angels for its arches, with saints and teachers for its pillars, and with worshippers for its pavement. Wherever there is Faith and Love this Temple is—J. H. Newman.

**THE RHYMING OPTIMIST**  
By Aline Michaelis  
LIFE MOVES IN CYCLES

Life moves in cycles and all seeming change is but the gutter of the turning wheel. For there is no new thing and nothing strange. Does the long passage of the years reveal?

There is no change. The Grecian Helen's look was clear as yours when she was glad to see you wear. Though now, between the pages of a book Her story dims in a neglected togetherness.

Life moves in cycles. Helen once was fair. As you today, for Paris' eyes to see As you for mine, and on your cheek you wear. No brighter beauty's banner than did she. Though I could doubt your like has been before.

Life whole like stars, what has been comes once more!

**Could Not Be Done**  
Uncle Tom: "So that's the baby?" Father: "Yes."

Uncle: "I hope you'll bring him up to be a conscientious, upright young man." Father: "I'm afraid that'll be difficult."

Uncle: "Pshaw! As the twig is bent so is the tree inclined." Father: "Yes, but this twig is bent in being a girl, and we're inclined to let it go at that."

Canadian western sheep ranges pass annually from 150,000 to 200,000 lambs suitable for fattening purposes. In addition, there are at least 100,000 to 150,000 unfattened farm lambs that would benefit by being fattened.

An ancient well, 250 feet deep, was discovered in Palmyra, several months ago, relieving drought in Palestine.

Dagenham, England, public library has abolished fines on overdue books.

THE CANADIAN MEDICAL  
ASSOCIATION AND LIFE-  
INSURANCE INSTITUTE  
OF CANADA

## It Aches!

Good health, personal comfort  
and appearance depend upon  
the mouth be kept clean, and  
free from decayed teeth and  
inflamed gums. Not only will  
decayed teeth become painful,  
but they prevent the proper  
chewing of food, are likely to  
foul the breath, and spoil the  
owner's good looks. Further-  
more, disease in and around the  
teeth is the cause of many  
serious disturbances in other  
parts of the body.Dental caries, or decay of the  
teeth, means the disintegration  
or breaking down of the tooth  
structure. It is the disease  
which most commonly occurs  
in the human family. Some people  
suffer a great deal others com-  
paratively little. At times  
decay occurs rapidly, and at  
others, not at all. In other  
words, individuals vary in their  
susceptibility to dental caries  
and there may be variation  
from time to time, in the same  
individual.If there is one primary or  
essential cause, it is not known.  
A number of factors are recog-  
nized as contributing to the  
occurrence of decay of the  
teeth. We may assume that  
decay never begins on the  
smooth clean surface of the  
teeth. There must be some  
groove or crack on the surface  
or between the surfaces.It is at such a point that de-  
cay begins, the enamel is per-  
forated and the damage spreads  
inside the tooth. The process  
is much more rapid inside be-  
cause there the tissue is soft as  
compared with the outer coating  
of enamel, this latter being the  
hardest substance in the body.  
The undermining may be so ex-  
tensive as to cause the tooth to  
crumble, and some day under  
the pressure of a bite, break.  
At this stage, the tooth is sensi-  
tive to heat or cold, to substances  
that are sweet or sour. The  
real pain, which we know as  
toothache, comes and persists  
when the decay reaches the  
pulp of the tooth, as it is there  
that the nerve is located.The prevention of dental  
caries and all that this implies  
means, first of all a proper diet,  
particularly early in life. By a  
proper diet is meant one that  
includes milk and fresh fruits  
and leafy vegetables to supply  
minerals and vitamins. The  
teeth and gums are kept healthy  
by use, so that some course  
of food is desirable to exercise  
the teeth, gums and jaw mus-  
cles. The teeth and gums should  
be kept clean by being thor-  
oughly brushed, preferably after  
each meal, but certainly without  
fall, after breakfast and before  
 retiring. The value of antiseptics  
in the mouth has never been  
demonstrated."Be true to your teeth, or  
they will be false to you."Whitewash Mixtures—cont.  
gallon would improve it, al-  
though not essential. Salt  
should be omitted if required  
for metal surfaces which rustBritain's Newest Campaign  
Pound-a-Week Bonus PlannedLondon—In the East London  
hall that saw the birth of an  
apparently forlorn campaign  
for old age pensions 40 years  
ago, a crusade to provide a  
pound-a-week bonus to every  
person in Britain, irrespective  
of position or employment, was  
launched by an enthusiastic  
meeting recently.It is maintained that such a  
national dividend would at one  
blow erase the "poverty of  
starvation." Those who have  
set the campaign in motion,  
the newly formed League to  
Abolish Poverty maintain that  
it could be achieved without  
extra burden on the state.Mr. William Ward, president  
of the World Brotherhood  
movement forecasts that, if the  
grass-roots spirit were maintain-  
ed, the National Dividend for  
all should be a recognized fact  
within one year."Through flaws in the money  
system and in distribution,"  
Mr. Ward declared, "wealth is  
wasted. The machine is not al-  
lowed to produce as much as it  
could. While there is poverty,  
there is also, the manufacturers  
tell us, a surplus, we are really  
wealthy. An English invest-  
igator has declared that there is  
enough surplus wealth now  
wasted to provide every family  
in Britain with an extra £300  
a year. An American, working  
independently and along entirely different lines, reached a  
figure of £75 for everyone. It  
is time that the abolition of  
poverty was taken seriously.  
We can do it. The Government  
must be made to realize that"Each life," Mr. Ward con-  
tinued, "has its meaning and  
value. Thus the abolition of  
poverty should be guaranteed  
a fair inheritance in society.  
That is the world brotherhood  
challenge. It must be imple-  
mented. The first step in im-  
plementing it is to provide a  
national dividend for all. It  
would provide a strength in  
times of unemployment. It  
would enable everybody to  
realize that they have a spark  
to do creatively artistic work.  
The boy who might have be-  
come a musician, but because  
there is no money, in music is  
forced to screw a nut on a bolt  
for eight hours every day of  
his working life, would be en-  
abled to train his other self."The Dean of Canterbury de-  
clared that speaking as an en-  
gineer—he served his appren-  
ticeship in an engineering work-  
shop—he knew that machines today  
could be made to manufacture  
just as much as man desired  
them to manufacture. He lik-  
ened the industrial system to  
an automobile which, although  
it could do 70 miles an hour was  
being driven at four."It is stupid to speak of any  
country as poor," the Dean de-  
clared. "If we could only re-  
alize it clearly enough, there is  
obviously enough, more thanenough, for all. We must see  
that money, the means to pur-  
chase our own invention sup-  
posedly to facilitate and not  
stop the exchange of goods, is  
properly and correctly man-  
ufactured and distributed.""The national dividend," he  
added, "will not only be a bless-  
ing as an escape from poverty,  
but it will most surely turn out  
to be a blessing to manufacturers,  
who are now forced to cur-  
tail and even throw their goods  
away."

## A Letter of Appreciation

Mr. Editor:

May I use your columns to  
address a letter to certain in-  
terested parties. I wish to ex-  
press my sincere appreciation to  
all those who helped in unload-  
ing and distributing the splen-  
dour of vegetables and fruit  
that we received at Empress  
from Blooming, Ontario. We  
all are assured that this gener-  
ous gift will be a great help to  
many in this part of the coun-  
try. Please accept my thanksfor such able and kindly assis-  
tance.Yours truly,
